

What is the New Hampshire ASTD Chapter?

The New Hampshire Chapter of **ASTD** grew out of the need to better meet the career development needs of professionals in the NH & Tri-state area. The New Hampshire Chapter was begun in 1978.

The New Hampshire Chapter works collaboratively with neighboring chapters and other professional organizations to bring its members current and relevant programs to expand skills and knowledge and to provide continuous networking opportunities.

There are monthly meetings from September through June highlighting current training and human resources issues and offers members a chance to meet with other professionals. Each year we try to feature a nationally recognized speaker. We are continually expanding our chapter programming to include more regions of New Hampshire.

Our highly regarded *Train The Trainer* Certification Program is offered for professionals for introductory and advanced levels of competency.

Various committee and Board participation affords additional opportunities for ASTD members.

Regardless of your motivation for joining NH ASTD, by attending our programs and becoming involved with our Chapter, you will gain a greatly expanded network of colleagues and resources as well as an increased skill level within your own field of expertise.

Dear Prospective Member,

As a training professional, you know how helpful it is to have a network of resources to assist you in servicing your customers in addition to increasing your skills and knowledge.

NH ASTD offers an opportunity to develop and share ideas and skills with others in the training profession. As an **ASTD** member, you are part of the world's largest training organization dedicated to supporting you, your profession and better business through the development of human skills and relationships.

By joining a local chapter of **ASTD**, you are saying two very important things. *First*, you are saying that you care about your future professional development and that you are taking a proactive role in that development.

Second, you are saying that you support a community-based effort to work with your fellow professionals to maintain the quality of life in this part of the world.

The viability of all of our futures depends on our ability to work together to build strong communities through economy-related workforce development and intelligent and sensitive relationships within our professional spheres of influence.

The Training & Development Professional faces unprecedented opportunity for influence and prosperity. **ASTD's** mission is to play an active role in this effort. We hope you will join us.

Sincerely,

Katrine N. Barclay, President

What are the benefits of becoming a member of ASTD-NH?

- Monthly speakers' meetings focusing on a particular topic of interest to training development professionals
